Vanmasters

Ready before you start

**Every working day begins with a decision.
With how the space in which we operate is prepared.
With the order, which is not an end in itself,
but the foundation of professionalism, safety, and efficiency.**

At VANMASTERS, we believe that a well-designed vehicle fit-out is much more than a system of shelves, drawers, and modules. It is a mobile workshop that organizes daily tasks, reduces task completion time, and allows you to focus on what really matters – the quality of the work performed.

We build our philosophy around one idea – order. We do not understand it merely as aesthetics or the proper arrangement of tools. For us, order means thoughtful organization, ergonomics of every movement, functionality of every solution, and attention to every construction detail. It is thanks to this that work becomes more intuitive, safe, and efficient.

When designing VANMASTERS fit-outs, we combine experience with modern design and high-quality materials. We create lightweight, durable solutions tailored to the individual needs of users, because we know that every profession has its own specifics, and every professional works differently.

Our values remain unchanged:

- **Order** – forming the foundation of every implementation and every project.
- **Mobile workshop** – a space designed to support professionals every day.
- **Ergonomics** – solutions that facilitate work and increase user comfort.
- **Attention to detail** – precision of execution visible in every construction element.
- **Lightness** – modern materials allowing high strength to be maintained with low fit-out weight.
- **Quality enclosed in order** – durability and reliability resulting from well-thought-out solutions.
- **Functionality** – every module, every drawer, and every element has its justified place and purpose.

We believe that a well-organized workspace provides more than just convenience. It provides confidence in action, peace of mind, and readiness for any challenge.

That is exactly why we create VANMASTERS.

VANMASTERS
Service Fit-out

Intelligent organization. Maximum ergonomics. Professionalism without compromise.

VANMASTERS is a modern service vehicle fit-out system, designed with professionals who work in the field every day in mind. It combines a lightweight structure, high durability, and intelligent solutions that increase comfort, safety, and work efficiency.

Every fit-out element has been developed in accordance with the principles of ergonomics and the Lean Management and 5S philosophies, so that all tools and materials have their place, and access to them is fast, intuitive, and convenient. It is a mobile workstation created for the most demanding users.

Every detail matters

Organized space management

The VANMASTERS fit-out system allows you to maximize the use of the vehicle's cargo space, while ensuring easy access to every piece of equipment.

The modular construction enables individual configuration of the fit-out according to the specifics of the work performed and the user's needs.

Ergonomics
that works for you

The system's greatest innovation is the electrically extending shelving platform, which allows the entire fit-out to be extended beyond the vehicle's outline.

Intelligent
LED lighting

Automatic lighting that reacts to the user's presence provides excellent visibility of the entire workspace.

The drive based on a servo motor and ball screw ensures:

- smooth and precise movement,
- intuitive joystick control,
- safe stopping in any position,
- reduction of bending, kneeling, and working in forced positions.

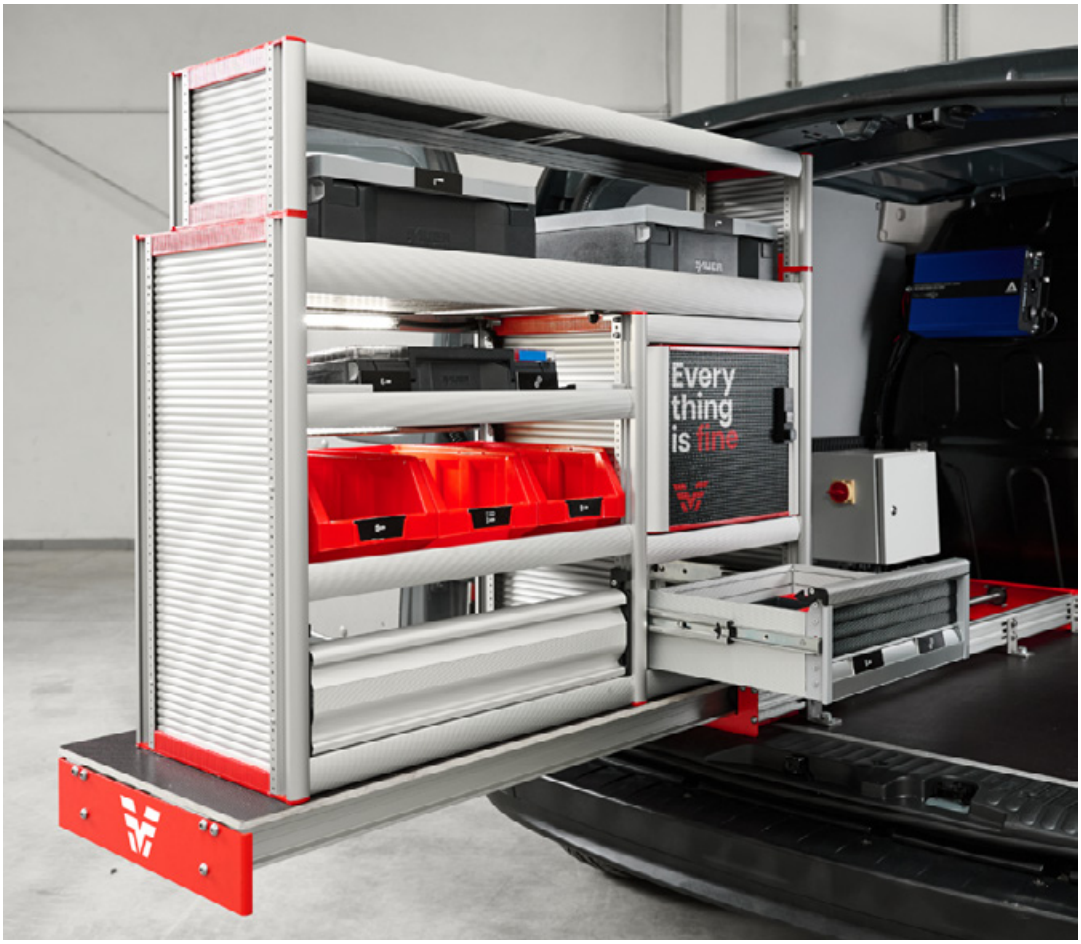

This solution significantly improves work comfort and reduces the risk of musculoskeletal strain during daily operation.

Benefits:

- comfortable work after dark,
- faster tool retrieval,
- greater safety of use,
- lower energy consumption thanks to automatic control.

Durable
aluminum shelves

Shelves made of anodized aluminum profiles are equipped with high edges protecting the transported items.

Their construction is based on lightweight honeycomb composite panels, which guarantee:

- high rigidity,
- low weight,
- resistance to damage,
- ease of cleaning.

Organizers compliant with 5S principles

Modular boxes, cases, and containers enable logical segregation of parts, materials, and tools.

Dedicated inserts and the ability to label ensure that every item has its permanent place, which shortens the time spent searching for equipment and increases work efficiency.

This solution works perfectly in mobile services, electrical installations, plumbing, and maintenance departments.

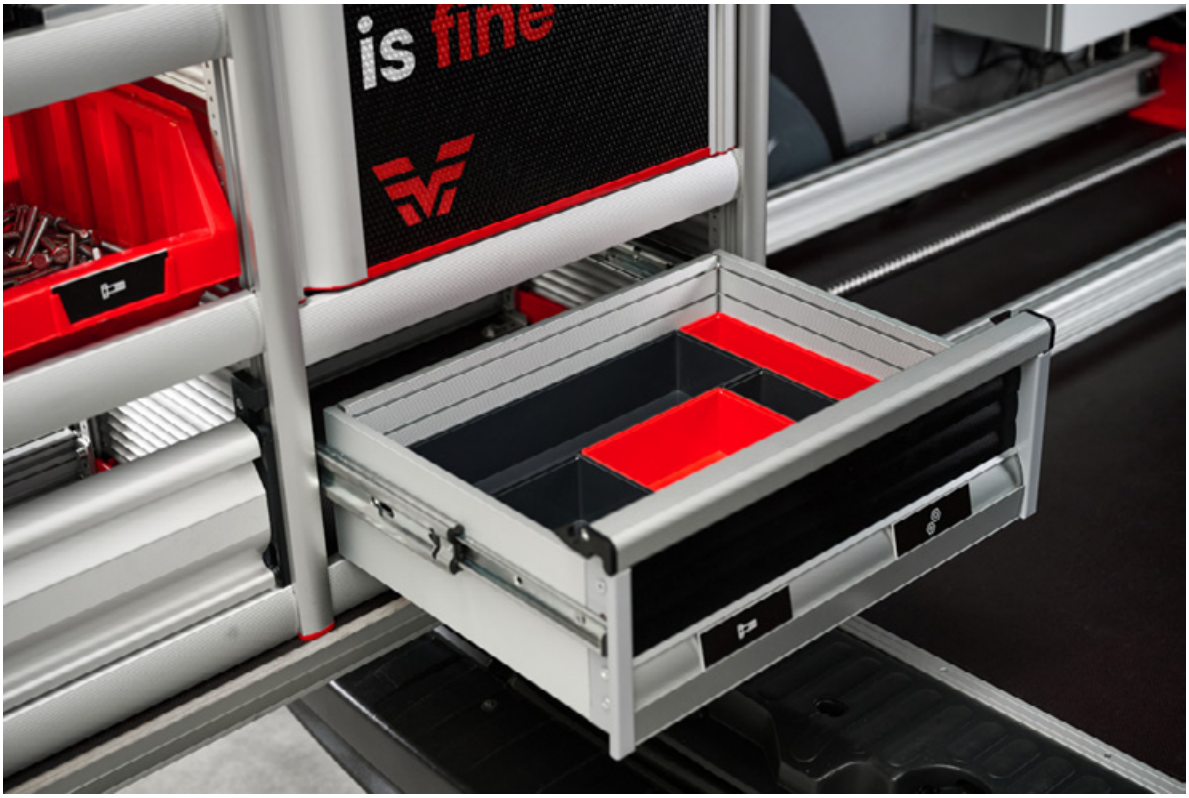

RFID Security Cabinet

The optional SAFE-type cabinet allows for the secure storage of power tools and valuable equipment.

The electronic RFID lock provides access control exclusively for authorized users, effectively securing the equipment against unauthorized access.

Functional drawers

Spacious drawers are equipped with a system of adjustable separators, allowing individual adaptation of the space to the type of transported items.

They are perfect for storing:

- **consumables and small parts,**
- **hand tools,**
- **mounting accessories.**

Modular crate system

Compatible tool crates enable safe transport and quick relocation of equipment without the need to repack it.

The ability to easily connect the crates allows for convenient organization of the workstation both in the vehicle and directly at the client's site.

Safety during transport

The fit-out elements are equipped with protections preventing the transported tools from shifting while driving.

Hinged flaps, high shelf profiles, and appropriately designed mounting systems guarantee stability even during intensive operation.

Key advantages of the VANMASTERS fit-out:

- ✓ Lightweight construction made of aluminum and composites
- ✓ Modular structure allowing individual configuration
- ✓ Electrically extending shelf with servo drive
- ✓ Intelligent LED lighting with presence sensor
- ✓ Organization compliant with 5S and Lean Management philosophies
- ✓ Secure RFID cabinet for power tools
- ✓ Adjustable drawers and modular organizers
- ✓ High durability and resistance to intensive operation
- ✓ Ergonomic solutions reducing operator fatigue
- ✓ Professional appearance enhancing the company's prestige

Vanmasters

We design mobile workstations that increase efficiency, improve safety, and allow professionals to work faster, more comfortably, and more effectively.

Intelligent fit-out for professionals.

Professionalism starts with order.
